- ✓ Most realistic and consistent ball roll
- ✓ Sharp edge cups - NO donut edges!
- ✓ Perfect for serious practice
- ✓ Chipping and Putting at its best
- ✓ Year-round surface - Indoors or Outdoors
- ✓ Zero maintenance greens
- ✓ No risk from weather, drought, or disease
- ✓ No special, expensive equipment needed

### BentGreen™

Our newest premier non-sand nylon turf.

This new design eliminates the need to fill the surface fibers with an aggregate, the nylon turf being denser eliminates the need for sand fill. Our newest addition green is our most versatile and can easily be "rolled-out" for immediate play on concrete or asphalt, and can be easily moved as the seasons dictate. One added benefit is the use of our patented **BentGreen Cups™**, making it now possible to install our greens on any surface without the need to install in-ground cups ... flexibility at its best!

### BentGreen™

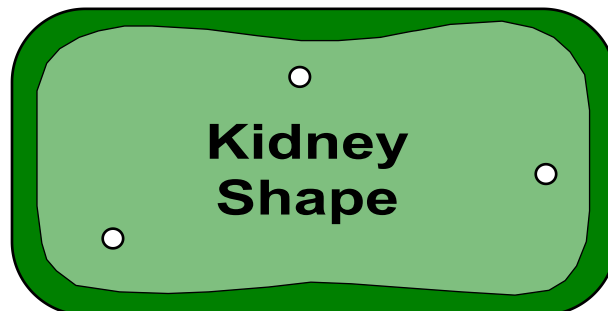

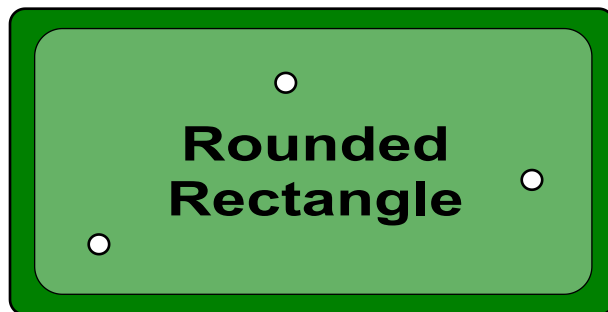

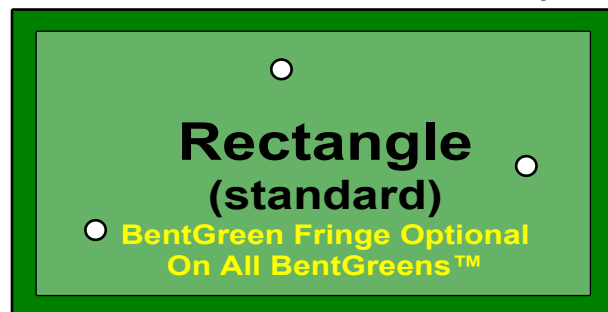

Our premier sand-filled nylon turf.

Silica sand (not supplied, but available locally) is used to fill the surface fibers. Use of silica sand in the surface turf fibers allows the user to adjust green speeds. Typical Stimp-Meter™ speeds achieved, range between 9 to 12 (level measurement). The user can then match a particular green speed for specific, quality practice time and realistic simulated play on any golf course green (private club, tournament player, or specific golf course).

Cups for both **BentGreen™** styles are available for above ground greens (**BentGreen Cups™**) and for in-ground installation, standard full-size or practice-size cups are also available. You may also add full size or practice size flags & flag sticks. We can easily help you decide which style best suits your installation desires and budget.

Our **BentGreen™** arrives to you ready to install over a concrete, asphalt, or crushed rock base, 4" to 6" thick (local road bed specifications prevail to your particular climate). We supply complete self-installable installation instructions along with toll-free phone support that will make your **BentGreen™** installation an enjoyable experience with the final result of owning the finest practice green available in the golf industry ... period!

BentGreen™ Standard with 3 Cups
